PROFESSIONAL SUMMARY

Software Developer specializing in Node.js, TypeScript, React.js, and AWS with proven experience at Fi Money optimizing backend systems, secure API integrations, and performance-critical features. Competitive programming background with 1100+ problems solved and a consistent top 7.45% ranking on LeetCode. Focused on building scalable, reliable systems and efficient APIs.

EDUCATION

B.Tech in Electronics and Communication Engineering

Indian Institute of Information Technology Nagpur | CGPA: 7.88/10.0

Nov 2022 - Jun 2026

TECHNICAL SKILLS

Languages: C/C++, Go, JavaScript, SQL, HTML5, CSS3

Backend: Node.js, Express.js, gRPC, REST APIs, Microservices, Distributed Systems

Frontend: React.js, Redux, Next.js, Tailwind CSS

Database: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS, ECR, ECS), Docker, Jenkins, Git, GitHub, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineering Intern | Fi Money

Bengaluru, India

Aug 2025 - Feb 2026

- Drove 50% increase in cross-sell conversions by building a Go service and TypeScript renderer that injected contextual product offers on loan and credit-card rejection screens.
- Implemented SDUI (Server Driven UI) by writing Go backend handlers and TypeScript UI components for the credit-card eligibility flow, integrating server-driven payloads with client rendering and validation.
- Secured lending vendor integrations by orchestrating Go + gRPC services with AES-CBC encryption, log-redaction utilities, and standardized error handling across multiple loan partners.
- Enhanced internal CX tool Sherlock by adding user classification, timestamps, and custom filters to the loans ticketing interface, and built lightweight gRPC endpoint that provides direct access to loan information for support queries.
- Actively participated in code reviews, sprint planning, and cross-team design discussions, driving better API design and maintainability across services.

PROJECTS

Video Sharing Platform - Backend | [GitHub](#)

Node.js, Express.js, MongoDB, JWT, Docker

Jan 2025

Backend system powering a video sharing platform with subscription-based content discovery, community engagement, and personalized watch history.

- Engineered a production-grade RESTful backend for a video sharing platform using Node.js, Express 5, and MongoDB, architecting 30+ API endpoints across 8 resource modules (Users, Videos, Playlists, Subscriptions, Comments, Likes, Tweets, Dashboard).
- Implemented secure JWT-based authentication with access/refresh token rotation, bcrypt password hashing, and httpOnly cookie sessions, ensuring zero-trust security across all protected routes.
- Integrated Cloudinary CDN for media asset management, handling video, thumbnail, and avatar uploads with automatic old-asset cleanup, reducing server storage overhead by 100%.

Naova E-Commerce Platform | [GitHub](#)

React.js, Node.js, Express.js, MongoDB, JWT, Stripe, Razorpay

June 2025

Full-stack e-commerce platform featuring dynamic product discovery, a real-time shopping cart, secure dual-gateway checkout, and administrative inventory dashboard.

- Developed an end-to-end e-commerce web application utilizing the MERN stack, delivering a high-performance customer storefront and a comprehensive React-based admin dashboard for inventory tracking.
- Orchestrated dual payment processing by embedding Stripe and Razorpay checkout workflows, alongside server-side webhook handlers that automatically lock in order fulfillment upon payment success.
- Architected a frictionless shopping cart experience using React Context for localized state synchronization, backed by an optimized MongoDB schema that persists sizing and quantity choices across sessions.

CERTIFICATIONS & ACHIEVEMENTS

- LeetCode:** Level: Knight | Max Rating: 1850 | Top 7.45% on leetcode | ID: [PARTHkadu18](#)
- Codechef:** Level: 3-star | Max Rating: 1622 | Global Rank 163 in Starters 126 Div 3 | ID: [parthkadu18](#)
- Solved **1100+** DSA coding problems across various coding platforms.
